PRATIK SANTHOSH

pratiksanthosh5976@gmail.com | 8137805022

PROFESSIONAL SUMMARY

- Senior Engineer - QA with 3 years and 4 months of experience across quality engineering, test automation, frontend development, API testing, and AI-powered applications.
- Currently working at QBurst Technologies Pvt. Ltd. on the High AI-Q Visualisation project, with hands-on involvement in React.js and TypeScript frontend development, dashboard development, API integration, KPI visualization, and quality engineering.
- Hands-on experience with GitHub Copilot and Claude Code for code generation, debugging, refactoring, implementation, and AI-assisted engineering workflows, with practical exposure to AI/LLM models.
- Experienced with Jira, Xray, TestRail, Azure DevOps, Qase, GitLab, and GitHub, along with modern testing, automation, CI/CD, and Agile/Scrum practices.

TECHNICAL SKILLS

Frontend: React.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, responsive UI, dashboard development

Visualization: Recharts, Highcharts, Chart.js, Apache ECharts, Nivo, KPI dashboards and data visualization

AI & AI-Assisted Development: GitHub Copilot, Claude Code, AI/LLM models, AI-assisted coding, prompt-driven development

Testing & Automation: Playwright, Cucumber, BDD, Postman, Bruno, REST Assured, .NET, C#, API testing

QA / Test Management: Jira, Xray, TestRail, Azure DevOps, Qase, ClickUp

Version Control / CI/CD: GitHub, GitLab, GitLab CI/CD

Other: SQL Database Testing, HttpClient, Java, Agile/Scrum, SDLC, STLC

PROFESSIONAL EXPERIENCE

Senior Engineer - QA | QBurst Technologies Pvt. Ltd.

Project: High AI-Q Visualisation | Nov 2025 - Present

High AI-Q Visualisation is a quality engineering and visualization platform focused on bringing together project quality metrics, testing insights, development metrics, non-functional testing results, KPI analytics, and visualization.

- Developing and maintaining frontend features using React.js and TypeScript, including reusable components, dashboards, KPI cards, charts, filters, and responsive UI.
- Building data-driven visualization dashboards using Recharts, Highcharts, Chart.js, Apache ECharts, and Nivo to present quality and engineering metrics.
- Integrating frontend applications with backend APIs and mapping API responses into KPIs, trends, charts, project health indicators, and configurable widgets.
- Working across Functional Testing, Test Management, Development, and Non-Functional Testing areas to visualize quality and engineering metrics.
- Working hands-on with AI/LLM models and AI-assisted development workflows as part of the product and engineering process.
- Using GitHub Copilot and Claude Code extensively for implementation, code generation, debugging, refactoring, analysis, and development productivity.
- Working with Jira, Xray, TestRail, Azure DevOps, Qase, GitLab, and GitHub for project, testing, repository, and engineering workflows.
- Contributing to requirement analysis, frontend implementation, API integration, testing, debugging, defect resolution, code reviews, and Agile/Scrum activities.

Next Gen AVM Lite — Jun 2024 – Jun 2025

Fleet telematics application designed to track vehicles using GPS technology and provide real-time location and business insights.

Technology: C#, REST Assured, Postman, .NET, GitLab CI/CD, Jira

- Analyzed user stories, designed test cases, conducted peer reviews, and prepared sprint test plans for functional and API testing.
- Built and maintained API test scripts using REST Assured, C#, and .NET for consistent API test coverage.
- Integrated API tests into GitLab CI/CD, automated test execution, and generated detailed test reports after each sprint.
- Reviewed API specifications and validated endpoints using Postman to identify discrepancies and flag risks early.
- Logged and tracked defects in Jira and collaborated with developers for timely resolution and retesting.

Hannover — Jan 2024 – May 2024

Application enabling bank-management providers to collect customer details for insurance and loan-related questionnaires.

Technology: Postman, HttpClient, C#, Jira

- Analyzed requirements and created detailed test cases for functional coverage.
- Developed an automation framework using HttpClient and C# and performed comprehensive functional testing.
- Performed API testing with Postman to validate request-response workflows and system behavior.
- Executed regression testing after defect fixes, logged defects, and tracked resolutions in Jira.
- Collaborated with the client during sprint stand-ups and mentored peers on Postman, Jira, and GitLab.

Real Estate Accelerator — Jun 2023 – Dec 2023

Web application for tracking real-estate tenancy contracts on a property basis, developed as an MVP.

Technology: Bruno, Playwright, TypeScript, ClickUp, GitHub Desktop, BDD, Cucumber

- Reviewed and analyzed user stories to design UI automation scenarios using Playwright with TypeScript.
- Created and maintained BDD feature files and automation scripts using Playwright, TypeScript, and Cucumber.
- Conducted smoke and regression testing and performed API testing using Bruno.
- Managed version control of the automation suite and presented automation coverage and progress through client demos.
- Logged and tracked defects in ClickUp to support timely resolution and test transparency.

EDUCATION

Master of Business Administration (M.B.A.) — Marketing and Finance

JAIN UNIVERSITY, 2026

Bachelor of Technology in Electronics and Communication — Christ (Deemed to be University), 2023
